

PowerElf II Case Study - Alliant Engineering

Challenge: Alliant Engineering, Inc. is a fast growing company that is continually adding staff and computer systems to their network, they needed a server solution that would provide ample storage for the companies files and projects. The company also wants a solutions that was scalable, they did not want to have to keep buying additional licenses for each user they added to their company.

Solution: PowerElf II. The PowerElf II server appliance was able to provide Alliant engineering with all the features they needed and more. They customized their PowerElf II to provide them with a much storage as possible, a SCSI tape drive system was added for easy archiving, and because the PowerElf II has no user licenses, Alliant can grow without having to pay out for expensive user license. They can add more computers to their network, add more email accounts or increase the number of clients who use the PowerElf II VPN system for no additional cost.

About: Alliant Engineering & Consulting LTD. is a company specializing in the areas of highway and bridge construction. Alliant Engineering provides a broad range of bridge services ranging from inspection right to design and construction. Alliant was incorporated as a specialist in highway and bridge construction, however they also have experience with airport runways and municipal subdivisions. Alliant is a fast growing engineering firm that is constantly striving to be the best in the business; whether it is the initial planning phase of a project, helping a client with funding assistance, project or site supervision or repairing roads and bridges, Alliant is 100% committed to client satisfaction.

What they have to say about the PowerElf II:

We have been extremely happy with our PowerElf II server appliance. It has really helped organize our office because all our files are now stored in a central location. The PowerElf II was easy to install and the technical support has always been very helpful in answering our questions.
