

PowerElf II Case Study - Bryan College

Challenge: Bryan college was in need of a server that could provide their email system with virus and spam filtering as well as block out undesirable web content for users on the network.

Solution: PowerElf II. By implementing the PowerElf server appliance into their network, Bryan College has taken back their email system. The military grade anti-virus solution keeps their mail system safe from viruses and the full scale spam filter provides complete customizable spam filtering. Bryan college also implemented the PowerElf II's web content filter to filter out inappropriate web sites.

Industry: University/College

Application: Web Content Filter - Spam Filter - Virus Filter

Region: USA

About: William Jennings Bryan University (in 1958 it was designated William Jennings Bryan College, and the name was shortened to Bryan College in 1993) was chartered in 1930 and admitted its first class in the fall of that year. Bryan College is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the associate and baccalaureate degrees.

What they have to say about the PowerElf II:

Two years ago our institution was looking for an effective, yet inexpensive solution for content filtering . When we stumbled upon Greencomputer's PowerElf product we were amazed to find a solution that fit our needs and our budget. We were further excited to find out the many other features built into PowerElf without any additional cost. When we opted for the additional antivirus protection, we had a one stop network appliance. This allowed us to save time and money as well as provide us with the protection and security we needed knowing that a Linux firewall protected our network. When the PowerElf 2 product line became available, we knew immediately that we needed to purchase one. Not only would we keep all the features we currently had, we would add features like antispam, improved content filtering, intrusion detection and protection, and automatic security and feature updates. The best part of all was the friendly and thorough support that Greencomputer offered us. Every network is unique, and the support staff at Greencomputer helped us setup and configure our PowerElf 2 to fit our unique network. Thank you Greencomputer for your great product and superb technical support.
