What they have to say about the PowerElf II:

We were searching for a product that provided HIPAA compliance firewall and website limitation services. This product not only provided HIPAA compliance but also delivered a group of great features. We can now host not only our website but e-mail services as well.

The anti-spam services work extremely well and keeps unwanted mail to a minimum. We have not suffered a single virus since activating the anti virus option. Easy connectivity from outside locations is another feature we appreciate. The Power Elf is a must have for the modern small business.
