

PowerElf II Case Study - YMCA of Greater Cincinnati

Challenge: The YMCA of Greater Cincinnati needed to upgrade their current web content filter solution as well as their spam and virus solution. Their current equipment all required expensive yearly licenses and had become very costly.

Solution: PowerElf II. The PowerElf II server appliance was a great fit for their network, it provided them with all the features they needed (anti spam, anti virus and web content filtering) at a fraction of the cost of their previous equipment. The PowerElf II also provided the YMCA with extra features such as an email gateway for their users and a file repository to store often used files and software.

When total cost of ownership is a priority, the PowerElf II provided the YMCA with all the features of the more costly solutions at an affordable price. The YMCA now has content filtering, anti spam and anti virus across their network at a price they can afford.

To learn more about the PowerElf server appliance, and to find out how it can work for your business please call toll free **1-877-693-7353**

Industry: YMCA - Non Profit

Application: Web Filtering, Anti Virus, Anti Spam, Gateway, and File Sharing.

Region: USA

About: YMCA of Greater Cincinnati is a non-profit organization where they build strong kids, strong families and strong communities

What they have to say about the PowerElf II:

Our experience was/is very positive with the PowerElf II. It replaced many of our computer NT based servers which lowered the fault tolerance. Now we are using PowerElf for Web Filtering, Anti Virus, Anti Spam and also as the Email Gateway. We also use PowerElf for file sharing across the association. The administration is very simple and it is a very stable system.
